THIRD QUARTER 2006 EDITION

NEW THERAPY CENTER

Summer 2005

Summer 2006

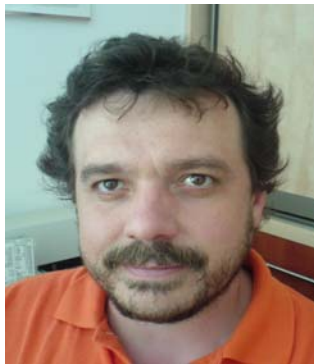

This year Norman Rehabilitation & Medical Center will be celebrating twelve years giving the innovative SPIDER therapy to patients with several neuromuscular conditions and proudly shares with you the construction of its new buildings which will be accommodating the patients and their families on a comfortable setting right next to our new therapy center.

We are open during construction, and are currently seeing our patients at the original center. We anticipate that our new center will be fully operating at the beginning of 2007. We will have seven accessible and comfortable rooms, each one with a private bathroom and the space our patients need to relax after having SPIDER therapy. We will also have a spacious dining area, family room, laundry facility, and a large garden to relax or simply admire the beautiful views of Koszalin.
